

Table of Contents

The 2007 Hybrid RANS-LES Symposium: An Outsider's View <i>P.R. Spalart</i>	1
Invited Keynote Papers	
Reliability of LES in Complex Applications <i>Bernard J. Geurts</i>	10
Turbulent Eddies in the RANS/LES Transition Region <i>Ugo Piomelli, Senthilkumaran Radhakrishnan, Giuseppe De Prisco</i>	21
Uncertainty Modeling, Error Charts and Improvement of Subgrid Models <i>P. Sagaut, J. Meyers, D. Lucor</i>	37
Hybrid RANS-LES Modelling and Related Numerical Issues	
Hybrid LES-RANS Method Based on an Explicit Algebraic Reynolds Stress Model <i>Michael Breuer, Benoît Jaffr�ezic, Antonio Delgado</i>	45
Hybrid LES-RANS: Inlet Boundary Conditions for Flows with Recirculation <i>Lars Davidson</i>	55
On the Use of Stimulated Detached Eddy Simulation (SDES) for Spatially Developing Boundary Layers <i>S. Deck, P.E. Weiss, M. Pami�es, E. Garnier</i>	67
Synthetic Inflow Boundary Conditions for Wall Bounded Flows <i>N. Jarrin, J.-C. Uribe, R. Prosser, D. Laurence</i>	77
X-LES Simulations Using a High-Order Finite-Volume Scheme <i>Johan C. Kok, Bambang I. Soemarwoto, Harmen van der Ven</i>	87
One-Equation RG Hybrid RANS/LES Modelling <i>C. De Langhe, J. Bigda, K. Lodefier, E. Dick</i>	97

Scrutinizing Velocity and Pressure Coupling Conditions for LES with Downstream RANS Calculations <i>Dominic von Terzi, Wolfgang Rodi, Jochen Fröhlich</i>	107
 Comparison of Different Modelling Approaches	
Computation of the Helicopter Fuselage Wake with the SST, SAS, DES and XLES Models <i>F. Le Chuiton, A. D’Alascio, G. Barakos, R. Steijl, D. Schwamborn, H. Lüdeke</i>	117
Numerical Simulation of the Flow in the Wake of Ahmed Body Using Detached Eddy Simulation and URANS Modeling <i>G. Martinat, R. Bourquet, Y. Hoarau, F. Dehaeze, B. Jorez, M. Braza</i>	125
DES and Hybrid RANS-LES Modelling of Unsteady Pressure Oscillations and Flow Features in a Rectangular Cavity <i>Shia-Hui Peng, Stefan Leicher</i>	132
Comparative Assessment of Hybrid LES/RANS Models in Turbulent Flows Separating from Smooth Surfaces <i>S. Šarić, B. Kniesner, A. Mehdizadeh, S. Jakirlić, K. Hanjalić, C. Tropea</i>	142
Numerical Investigation of a Laboratory Combustor Applying Hybrid RANS-LES Methods <i>A. Widenhorn, B. Noll, M. Stöhr, M. Aigner</i>	152
 Applications of DES and DES Variants	
DES of a Cavity with Spoiler <i>Richard Ashworth</i>	162
DES Analysis of Confined Turbulent Swirling Flows in the Sub-critical Regime <i>A.C. Benim, M.P. Escudier, A. Nahavandi, K. Nickson, K.J. Syed</i>	172
Zonal-Detached Eddy Simulation of Transonic Buffet on a Civil Aircraft Type Configuration <i>V. Brunet, S. Deck</i>	182
Detached Eddy Simulation of Separated Flow on a High-Lift Device and Noise Propagation <i>C. Lübon, M. Kessler, S. Wagner, E. Krämer</i>	192

Unsteady CFD Analysis of a Delta Wing Fighter Configuration by Delayed Detached Eddy Simulation <i>Heinrich Lüdeke, Stefan Leicher</i>	202
Comparison of DES and LES on the Transitional Flow of Turbine Blades <i>F. Magagnato, B. Pritz, M. Gabi</i>	212
Demonstration of Improved DES Methods for Generic and Industrial Applications <i>C. Mockett, B. Greschner, T. Knacke, R. Perrin, J. Yan, F. Thiele</i>	222
Towards a Successful Implementation of DES Strategies in Industrial RANS Solvers <i>L. Temmerman, Ch. Hirsch</i>	232
Delayed Detached-Eddy Simulation of Supersonic Inlet Buzz <i>S. Trapier, S. Deck, P. Duveau</i>	242
DES Applied to an Isolated Synthetic Jet Flow <i>H. Xia, N. Qin</i>	252
 Advanced URANS Modelling and Applications	
Development and Application of SST-SAS Turbulence Model in the DESIDER Project <i>Y. Egorov, F. Menter</i>	261
Numerical Simulation of the Dynamic Stall of a NACA 0012 Airfoil Using DES and Advanced OES/URANS Modelling <i>G. Martinat, Y. Hoarau, M. Braza, J. Vos, G. Harran</i>	271
Turbulence Modelling of Strongly Detached Unsteady Flows: The Circular Cylinder <i>A. Revell, T. Craft, D. Laurence</i>	279
 SGS Modelling and LES Applications	
A New Variant of Subgrid Dissipation for LES Method and Simulation of Laminar-Turbulent Transition in Subsonic Gas Flows <i>T.G. Elizarova, P.N. Nikolskii, J.C. Lengrand</i>	289
Formulation of Subgrid Stochastic Acceleration Model (SSAM) for LES of a High Reynolds Number Flow <i>V. Sabel'nikov, A. Chtab, M. Gorokhovskii</i>	299

Flow Around a Surface-Mounted Finite Cylinder: A Challenging Case for LES	
<i>S. Krajnović</i>	305
Compressibility Effects on Turbulent Separated Flow in a Streamwise-Periodic Hill Channel – Part 2	
<i>J. Ziefle, L. Kleiser</i>	316
